

ENVIRONMENTAL POLICY

We shall minimize the environmental impact and have high requirements on energy performance in our material handling products and operations.

We achieve this by:

From a life cycle perspective and in collaboration with our suppliers develop environmentally and energy adapted products.

Utilizing efficient manufacturing and logistic processes that have minimal environmental impact and reduces climate change.

Involving and delegating responsibility for environmental and energy issues at all levels of the company.

Making decisions based on facts.

Continuously improving our products, activities and processes.

We comply with or exceed the applicable legal requirements, our customer's and stakeholder's expectations.

Kristian Björkman

Kristian Björkman MD, Toyota Material Handling
Manufacturing Sweden AB, Mjölby October 2017

Toyota Material Handling Manufacturing Sweden AB develops and manufactures material handling products and solutions for internal material handling.
