# Strengths and Improvement Areas

## Environment

Weight ●●●●

### Strengths (50)

#### Policies

Strengths

Quantitative objectives set on materials, chemicals & waste

Quantitative objectives set on water

Quantitative objectives set on energy consumption & GHGs

Environmental policy on product end-of-life

Environmental policy on product use

Environmental policy on materials, chemicals & waste

Environmental policy on local & accidental pollution

Environmental policy on water

Environmental policy on energy consumption & GHGs

Endorsement of the Science Based Targets initiative - Committed

Exceptional policy on major environmental issues

#### Actions

Strengths

Training of employees on energy conservation/climate actions

Purchase and/or generation of renewable energy

Company-specific emergency preparedness and response procedure regarding local pollution

Reduction of carbon emissions in transportation

Improvement of energy efficiency through technology or equipment upgrades

Energy and/or carbon audit

ISO 50001 certified

Example of products with reduced environmental impacts i.e. ecoproducts

Measures to reduce energy consumption

On-site wastewater treatment unit

Measures to reduce paper consumption

Measures to reduce noise at worksite/construction site

Eco-design measures to increase thermal insulation in buildings

Products designed for easy recyclability

Eco-design changes implemented to enable reduction in energy consumption

Regular soil testing for heavy metal contamination

Control of wastewater generated in finishing operations such as quenching and deburring

Measures to reuse or recycle waste

Measures to avoid emissions of dust or particles

Measures implemented to reduce pollutants discharged into water

Waste management measures in place

Reduction of water consumption through innovative equipments, methods or technologies

Measures for handling hazardous substances

Company recycling infrastructure or formal partnership established

ISO 14001 certified on more than 81% of operational sites

## Results

### Strengths

Reporting in accordance with GRI Standards (option "Core")

Reporting on total amount of renewable energy consumed

Reporting on total water consumption

Reporting on total weight of non-hazardous waste

Reporting on total weight of hazardous waste

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Parent company reports to CDP

Reporting on scope 2 GHG emissions

Reporting on scope 1 GHG emissions

The 360° Watch has identified innovative best practices and/or external recognition regarding environmental issues (see 360° Watch section).

Reporting on total energy consumption

Comprehensive reporting on environmental issues

**Strengths (41)**

**Policies**

Strengths

Quantitative objectives set on employee health & safety

Labor & human rights policy on diversity, discrimination & harassment

Labor & human rights policy on child labor, forced labor & human trafficking

Labor & human rights policy on career management & training

Labor & human rights policy on social dialogue

Labor & human rights policy on working conditions

Labor & human rights policy on employee health & safety

Comprehensive policy on a majority of labor or human rights issues

Health and safety policy also covers subcontractors working on the company premises

Endorsement of external initiative on labor or human rights issues [EU-OSHA Healthy Workplaces Campaign Partner]

**Actions**

Strengths

ISO 45001 certified on more than 81% of operational sites

Bonus scheme related to company performance

Flexible organization of work available to employees (e.g. remote work, flexitime)

Actions to promote wage equality in the workplace

Awareness training regarding diversity, discrimination, and/or harassment

Active measures for the prevention of musculoskeletal disorders

Emergency preparedness plan to all impacted employees (e.g. fire drills)

Whistleblower procedure on human rights issues

Employee representatives or employee representative body (e.g. works council)

External audits on health & safety issues

Internal audits on health & safety issues

Specific measures on discrimination issues

Employee health & safety detailed risk assessment

Transparent recruitment process communicated clearly and formally to all candidates

Actions to prevent discrimination during recruitment phase

Regular assessment (at least once a year) of individual performance

Mandatory health check-up for employees

Active preventive measures for stress

Provision of skills development training

Joint labor management health & safety committee in operation

Setting of individual career plan for all employees

European Works Council in place

Training of relevant employees on health & safety risks and best working practices

### Results

Strengths

Reporting in accordance with GRI Standards (option "Core")

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Reporting on the percentage of women in top executive positions

Comprehensive reporting on labor and human rights issues

Reporting on accident severity rate

Reporting on accident frequency rate

### Improvement Areas (2)

#### Results

Priority

Improvement Areas

Low

Claims presence of employees under 18 working or living on production sites with risks of exposure to chemicals, pesticides, machines or tools, dust or excessive cold, heat or noise

Low

Declares reporting on average training hours per employee, but no supporting documentation available

Ethics

Weight ●●●●

### Strengths (29)

#### Policies

Strengths

Policy on conflict of interest

Disciplinary sanctions to deal with policy violations

Employee signature acknowledgement of ethics policies

Policy on information security

Policies on corruption

Policy on anticompetitive practices

Dedicated responsibility for ethics issues

Comprehensive policies on ethics issues

## Actions

### Strengths

Whistleblower procedure for stakeholders to report information security concerns

Whistleblower procedure for stakeholders to report anti-competitive practices

Whistleblower procedure for stakeholders to report corruption and bribery

Incident response procedure (IRP) to manage breaches of confidential information

Implementation of a records retention schedule

Information security risk assessments performed

Awareness training to prevent information security breaches

Provision of competitor interaction guidelines to key employees

Anti-competitive practices risk assessments performed

Corruption risk assessments performed

Measures to protect third party data from unauthorized access or disclosure

Audits of control procedures to prevent corruption

Awareness training performed to prevent corruption

Anti-corruption due diligence program on third parties in place

Specific approval procedure for sensitive transactions (e.g. gifts, travel)

Audits of control procedures to prevent anticompetitive practices

Awareness training performed to prevent anticompetitive practices

## Results

### Strengths

Reporting in accordance with GRI Standards (option "Core")

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

### Improvement Areas (3)

#### Policies

Priority Improvement Areas

Low

No information on endorsement of external initiatives on ethics issues

#### Actions

Priority Improvement Areas

Medium

Supporting documentation demonstrates a medium level of coverage of ethics actions throughout the company operations

#### Results

Priority Improvement Areas

High

Insufficient number of KPIs disclosed on ethics issues

## Sustainable Procurement

Weight ●●●●

### Strengths (16)

#### Policies

Strengths

Comprehensive sustainable procurement policies on both social and environmental factors

#### Actions

Strengths

Supporting documentation demonstrates a high level of coverage of sustainable procurement actions throughout the company supplier base/operations

Supplier sustainability code of conduct in place

Formal assessment of suppliers' progress with regards to REACH requirements

Capacity building of suppliers on environmental or social issues (e.g. corrective actions, training)

On-site audits of suppliers on environmental or social issues

Regular supplier assessment (e.g. questionnaire) on environmental or social practices

Training of buyers on social and environmental issues within the supply chain

Integration of social or environmental clauses into supplier contracts

Sustainability risk analysis (i.e. prior to supplier assessments or audits)

#### Results

Strengths

Reporting in accordance with GRI Standards (option "Core")

Declares using no tin, tantalum, tungsten, gold, and/or their derivatives (Not verified)

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Standard reporting on sustainable procurement issues

### Improvement Areas (1)

#### Actions

Priority Improvement Areas

Low

Declares that performing suppliers on environmental and social issues have access to unique incentives (e.g. supplier awards, preferred supplier program, access to RFPs) but no supporting documentation

## 360° Watch Findings

19 January 2022

### Toyota launches new electric counterbalance forklifts

<http://www.shdlogistics.com/fork-lift-trucks/toyota-launches-new-electric-counterbalance-forklifts>

Toyota Material Handling UK has launched a new electric counterbalance range, which comes with a choice of lithium-ion, lead-acid or hydrogen power options. At most sites, a lithium-ion-powered Traigo80 will operate continuously during multiple shifts without a battery change - saving the cost of additional batteries and battery changing equipment. Meanwhile, for users that choose the traditional lead-acid battery option, the new truck offers quick and easy sideways battery changing, while improved motor and component technology means the lead acid battery-driven Traigo80 consumes 15% less energy when compared to the previous model - even in the most intense and demanding applications.

### Toyota recalls Venza SUVs to fix air bag wiring problem

<http://wtop.com/recalls/2021/04/toyota-recalls-venza-suvs-to-fix-air-bag-wiring-problem/>

Toyota is recalling about 373,000 Venza SUVs worldwide because a wiring problem can stop the side air bags from inflating in a crash. The recall covers Venzas from the 2009 through 2015 model years, including nearly 280,000 in the U.S. Documents posted Thursday by the U.S. National Highway Traffic Safety Administration say wires to the air bag sensor in the driver's side door can become damaged with regular use. That could stop the side and curtain air bags from deploying when needed.
