NAVIGATING I_SITE

TOP NAVIGATION BAR

Top navigation bar is the main means of moving around I_SITE and accessing various features and reports. The picture below shows the most advanced view with all features and roles enabled. Clicking on the icon will load the default report or function in a given module and load a side bar which shows all reports and features available in the module.

Home	Dashboard
Utilization	View site, machine, driver and contract utilization, check battery status, view driver, machine and battery activity
Shocks	View shocks on the machine, view shocks associated with drivers, comment shocks
Pre-Op. Check	Manage pre-op checklists, view pre-operation checklist reports, manage messages, view message reports
Manage Site	Create driver groups, create machine groups, configure machines, manage drivers
Administration	Manage user access
MyFleet	Information about fleet composition, cost and service

SIDE BAR

All modules have a sidebar with additional reports and functions that can be accessed. These are described in a section corresponding to each module. Clicking on the report / function name in the side bar will load the report / function window.

MAINTENANCE NOTICE

Notifications of planned maintenance and other web service information are posted above the top navigation bar.

HELP

To access additional support materials, e-learning or to download smart access application and files click on help in the top right corner of the web portal.
