## Environment

Weight ●●●●

### Strengths

#### Policies

Strengths

Environmental policy on air pollution

Quantitative objectives set on energy consumption & GHGs

Environmental policy on product end-of-life

Environmental policy on product use

Environmental policy on materials, chemicals & waste

Environmental policy on water

Environmental policy on energy consumption & GHGs

Endorsement of the Science Based Targets initiative - Committed

Comprehensive policy on a majority of environmental issues

#### Actions

Strengths

Other actions to ensure safe management of hazardous substances

Use of alternative, less hazardous substances in operations

Use of recovered input materials

Reduction of hazardous substance generation or toxicity

Environmental emergency measures in place

Reduction of material consumption through process optimization

Mapping of waste streams

Reduction of internal wastes through material reuse, recovery or repurpose

Actions to prevent emissions of atmospheric pollutants and other environmental nuisances (e.g. noise, odor, vibration, road and light)

Reduction of water consumption in painting and cleaning processes

Water accounting or auditing performed

Training of employees on energy conservation/climate actions

Purchase and/or generation of renewable energy

Purchase of verified carbon offset credits

Improvement of energy efficiency through technology or equipment upgrades
Technologies or practices to recycle or reuse water
Energy and/or carbon audit
Provision of specific information to customers regarding product end-of-life
ISO 50001 certified
Implementation of a rainwater harvesting system
ISO 14001 certified
Use of waste heat recovery system(s) or combined heat and power unit(s)
Formal life-cycle analysis performed on key products
41-60% of operational sites ISO 14001 certified
Products designed for easy recyclability
Actions for labeling, storing, handling and transporting hazardous substances
<b>Results</b>
Strengths
Total gross Scope 2 reporting value confirmed in supporting documentation
Total gross Scope 1 reporting value confirmed in supporting documentation
Reporting on total gross Scope 2 GHG emissions (market or location based)
Reporting on total gross Scope 1 GHG emissions
Reporting on total amount of water recycled and reused
Total gross Scope 3 downstream GHG emissions value confirmed in supporting documentation
Reporting on total gross Scope 3 downstream GHG emissions
Reporting is formally aligned with a reporting standard on environmental issues
Reporting on total weight of waste recovered
Total gross Scope 3 GHG emissions reporting value confirmed in supporting documentation
Reporting on total amount of renewable energy consumed
Reporting on total water consumption
Reporting on total weight of non-hazardous waste
Reporting on total weight of hazardous waste
Reporting on total gross Scope 3 GHG emissions

Materiality analysis in sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Company reports to CDP

The 360° Watch has identified innovative best practices and/or external recognition regarding environmental issues (see 360° Watch section).

Reporting on total energy consumption

Comprehensive reporting on environmental issues

### Improvement Areas

#### Results

Priority Improvement Areas

Low

No external assurance or verification of sustainability reporting

Low

No information related to whether any sites/operations are located in or near biodiversity-sensitive areas

Low

No information on reporting on total weight of air pollutants

## Labor & Human Rights

Weight ●●●●

### Strengths

#### Policies

Strengths

Quantitative objectives set on diversity, equity & inclusion

Quantitative objectives set on career management & training

Quantitative objectives set on employee health & safety

Labor & human rights policy on diversity, equity & inclusion

Labor & human rights policy on career management & training

Labor & human rights policy on social dialogue

Labor & human rights policy on working conditions

Labor & human rights policy on employee health & safety

Comprehensive policy on a majority of labor or human rights issues

#### Actions

Strengths

Skills development program tailored to employee needs

Actions to address stress and psychological wellbeing in the workplace

Employee health and safety emergency action plan

Other actions to promote diversity, equity & inclusion
ISO 45001 certified on more than 81% of operational sites
ISO 45001 certified
Compensation for extra or atypical working hours
Employee satisfaction survey
Bonus scheme related to company performance
Flexible organization of work (eg. remote work, flexi-time)
Grievance mechanism on discrimination and/or harassment issues
Employee representatives or employee representative body (e.g. works council)
Provision of protective equipment to impacted employees
Grievance mechanism on child labor, forced labor and/or human trafficking issues
Regular assessment of individual performance
Two-way communication system in place to facilitate employee voice regarding working conditions
Actions to promote internal mobility
European Works Council in place
Training of employees on health and safety risks and best working practices
<b>Results</b>
Strengths
Reporting on the percentage of women at top management level
Reporting on number of recordable work-related accidents
Reporting on number of days lost to work-related injuries, fatalities and ill health
Reporting is formally aligned with a reporting standard on labor and human rights issues
Reporting on the percentage of women employed in relation to the whole organization
Materiality analysis in sustainability reporting
Company communicates progress towards the Sustainable Development Goals (SDGs)
Comprehensive reporting on labor and human rights issues
<b>Improvement Areas</b>

**Policies**

Priority Improvement Areas

Medium

Inconclusive documentation for policies on child labor, forced labor & human trafficking

Low

Inconclusive documentation for policies on health and safety for subcontractors working on the premises

Low

No quantitative target set on living wage

Low

No conclusive information on endorsement of external initiatives or principles on labor and human rights issues

**Actions**

Priority Improvement Areas

Low

Declares measures on living wage, but no supporting documentation available

Low

The company declares its main operation(s) is located in a region where the right to freedom of association is restricted by local law/regulation

**Results**

Priority Improvement Areas

Low

No information on average hours of training per employee

Low

No external assurance or verification of sustainability reporting

Low

No information regarding reporting on living wage issues

Low

No information on reporting on ratio of the annual total compensation of the highest paid individual, to the median annual total compensation for all employees

**Ethics**

Weight ●●●●

**Strengths**

**Policies**

Strengths

Policy on fraud

Policy on conflict of interest

Disciplinary sanctions to deal with policy violations

Employee signature acknowledgement of ethics policies

Policy on information security

Quantitative objectives set on some relevant issues

Policies on corruption

Exceptional policy on ethics issues

Policy on anticompetitive practices

Dedicated responsibility for ethics issues

**Actions**

Strengths

Other actions to ensure information security

Whistleblower procedure for stakeholders to report corruption and bribery

Incident response procedure (IRP) to manage breaches of confidential information

Information security risk assessments performed

Audits of control procedures to prevent information security breaches

Awareness training to prevent information security breaches

Provision of competitor interaction guidelines to key employees

Anti-competitive practices risk assessments performed

Corruption risk assessments performed

Supporting documents show a high level of coverage of ethics actions or certification throughout company operations

Measures to protect third party data from unauthorized access or disclosure

Audits of control procedures to prevent corruption

Awareness training performed to prevent corruption

Anti-corruption due diligence program on third parties in place

Audits of control procedures to prevent anticompetitive practices

Awareness training performed to prevent anticompetitive practices

**Results**

No conclusive documentation on approval procedure for sensitive transactions (e.g. gifts, entertainment)

## Results

Priority Improvement Areas

High

Insufficient reporting on ethics issues

Low

No external assurance or verification of sustainability reporting

## Sustainable Procurement

Weight ●●●●

### Strengths

#### Policies

Strengths

Quantitative objectives set on sustainable procurement policy

Comprehensive sustainable procurement policies on both social and environmental factors

#### Actions

Strengths

Other actions to promote sustainable procurement

Worker voice surveys or other advanced supplier monitoring practices (e.g. second tier audits)

Supplier sustainability code of conduct in place

Formal assessment of suppliers' progress with regards to REACH requirements

Sustainable procurement objectives integrated into buyer performance reviews

Capacity building of suppliers on environmental or social issues (e.g. corrective actions, training)

Regular supplier assessment (e.g. questionnaire) on environmental or social practices

Training of buyers on social and environmental issues within the supply chain

Integration of social or environmental clauses into supplier contracts

#### Results

Strengths

Total gross Scope 3 upstream GHG emissions value confirmed in supporting documentation

Reporting on total gross Scope 3 upstream GHG emissions

Reporting is formally aligned with a reporting standard on sustainable procurement issues

Declares using no tin, tantalum, tungsten, gold, and/or their derivatives (Not verified)

Materiality analysis in sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Comprehensive reporting on sustainable procurement issues

### Improvement Areas

#### Actions

Priority Improvement Areas

Medium

Supporting documents show a medium level of coverage of sustainable procurement actions throughout company operations or supplier base

Medium

No conclusive documentation on sustainability risk analysis (i.e. prior to supplier assessments or audits)

Medium

No conclusive documentation on on-site audits of suppliers on environmental or social issues

#### Results

Priority Improvement Areas

Low

No external assurance or verification of sustainability reporting

### Toyota Industries faces crackdown for engine emissions cheating - Nikkei

Japan's transport ministry is preparing action against a Toyota Motor Corp (7203.T), opens new tab affiliate for cheating engine emissions tests, including possibly withdrawing certification for some engine types, Nikkei reported on Monday. The ministry will order Toyota Industries (6201.T), opens new tab, the world's largest manufacturer of forklift trucks, to take steps to prevent a "recurrence of the misconduct", the newspaper reported, citing people familiar with the matter. The company reported to the ministry in January that it had engaged in misconduct that included tampering with performance test data for multiple forklift and automobile engine models, Nikkei added.

### Toyota Industries Corporation recalls 70,000 forklifts and other vehicles due to durability test irregularities. [JP]

On 11th, Toyota Industries Corporation has filed a recall for over 72,000 forklifts with the Ministry of Land, Infrastructure, Transport, and Tourism in response to the recent scandal involving its engine testing. The recall affects Toyota Geneo and Toyota Shovel Loader models manufactured between October 2014 and last month, all of which are equipped with engines that were found to have been improperly tested for durability by using estimated values rather than actual tests. According to the ministry, the engine control program is inadequate, and there is a risk that the concentration of exhaust gas will exceed the regulatory limit if used for an extended period.

### Ended up in hospital after mischarging a lead-acid battery [NO]

Last autumn, one of Toyota's truck technicians was only going to visit a customer's premises, to look at a truck, but quickly sensed trouble when he locked himself inside. There was smoke in the room, and the technician first withdrew, before he decided to enter the room where a truck was charging. When the technician came out, he quickly noticed that something was wrong. He started coughing and his lungs hurt. He first went to the emergency room, and was told to go home and rest, and come back if it got worse. After a couple of days, he had to be admitted to hospital for breathing assistance.

### Fuel consumption reduced by 40%, Toyota Loom's new technology for space static electricity elimination system [JP]

Toyota Industries Corporation has established a technology that can reduce the amount of liquefied natural gas (LNG) used by 40% compared to conventional methods when removing static electricity in the space that causes product defects. In the past, static electricity was removed by humidifying the entire space with air conditioning and a steam boiler. This will lead to a reduction in carbon dioxide (CO2) emissions at production sites.

### Japan Fair Trade Commission asks 13 companies, including Denso, Toyota Industries, Sagawa Express, and Zen-Noh, to make improvements by keeping transaction prices unchanged [JP]

The Japan Fair Trade Commission (JFTC) has announced the results of an urgent survey of whether or not the increase in costs is being passed on to large companies that place orders, as part of efforts to create an environment that makes it easier for small and medium-sized companies to raise wages. Thirteen companies, including Denso, Toyota Industries, Sagawa Express, and the National Federation of Agricultural Cooperatives (ZEN-NOH), were accused of leaving transaction prices unchanged without consultation with subcontractors facing soaring raw material and labor costs. As a result of the investigation, 4,030 companies were found to have acted as "abuse of a superior bargaining position" prohibited by the Anti-Monopoly Act, such as refusing to negotiate a price increase, and the JFTC issued a warning. and sent the document.

### Toyota Industries to renovate the core products of its founding business [JP]

Toyota Industries Corporation has completely redesigned the "Air Jet Loom", the main product of its founding textile machinery business, for the first time in about nine years. Efficiency and energy conservation were improved in order to deal with issues such as labor shortages and rising electricity bills. The new machine is equipped with a sensor that detects the warp of the weft yarn, and can automatically adjust the pressure of the air that blows the yarn. Furthermore, by adopting a high-efficiency motor and reviewing the design, the power consumption has been reduced by up to about 20% compared to conventional models.

### Toyota is working with a US lab to build a fuel-cell power generator

Toyota Motor North America is working on the installation of a hydrogen-based fuel cell power generator at the National Renewable Energy Laboratory's campus in Arvada, Colo. The proton exchange membrane system, a type of hydrogen-based fuel cell technology, will be built from multiple Toyota fuel cell modules. The project shows how Toyota's fuel cell technology can be scaled, from a single module for an electric car to a larger system powering heavy equipment. In addition to the fuel cell generator, the research project includes an electrolyser—a machine that splits water into hydrogen and oxygen—and a hydrogen storage system. It will showcase renewable hydrogen production, as well as energy storage, power generation and integration with the power grid.

### Toyota launches new electric counterbalance forklifts

Toyota Material Handling UK has launched a new electric counterbalance range, which comes with a choice of lithium-ion, lead-acid or hydrogen power options. At most sites, a lithium-ion-powered Traigo80 will operate continuously during multiple shifts without a battery change - saving the cost of additional batteries and battery changing equipment. Meanwhile, for users that choose the traditional lead-acid battery option, the new truck offers quick and easy sideways battery changing, while improved motor and component technology means the lead acid battery-driven Traigo80 consumes 15% less energy when compared to the previous model - even in the most intense and demanding applications.

### YPF Gas y Toyota Material Handling se unen por una movilidad sustentable para la industria

Mediante este acuerdo, Toyota Material Handling recomendará la utilización del GLP YPF Gas en sus autoelevadores y su abastecimiento de la Red que la compañía tiene en todo el país. Además, los clientes de Toyota podrán acceder a beneficios exclusivos otorgados por YPF Gas. El GLP, por ser un derivado del gas, es una energía más limpia y amigable con el medio ambiente por emitir menores cantidades de gases de efecto invernadero a la atmósfera que otros combustibles.

### Toyota recalls Venza SUVs to fix air bag wiring problem

Toyota is recalling about 373,000 Venza SUVs worldwide because a wiring problem can stop the side air bags from inflating in a crash. The recall covers Venzas from the 2009 through 2015 model years, including nearly 280,000 in the U.S. Documents posted Thursday by the U.S. National Highway Traffic Safety Administration say wires to the air bag sensor in the driver's side door can become damaged with regular use. That could stop the side and curtain air bags from deploying when needed.
