

Greenhouse Gas Verification Statement Number UK.VOL.INV.0752.2025

The inventory of Greenhouse Gas emissions in the period April/1/2024 to March/31/2025 of:

Toyota Material Handling Europe

Schoondonkweg 1,
2830 Willebroek,
Belgium

has been verified in accordance with ISO 14064-3:2019 as meeting the principles of Transparency, Accuracy, Consistency and Relevance of:

29,163 tCO₂e Scope 1
1,089 tCO₂e Scope 2 (Market-based)

4,693 tCO₂e Outside of Scopes

For the following activities

Provision of lift trucks and other industrial vehicles and logistics solutions.
Manufacturing and office facilities.

Schedule Accompanying Greenhouse Gas Verification Statement Number UK.PRS.VOL.INV.0752.2025

Brief Description of Verification Process

SGS has been contracted by Toyota Material Handling Europe for the verification of direct and indirect carbon dioxide (CO₂) equivalent emissions as provided by Toyota Material Handling Europe, Schoondonkweg 1, 2830 Willebroek, Belgium in their GHG Statement the form of a Greenhouse Gas Emissions Report covering CO₂ equivalent emissions.

Roles and responsibilities

The management of Toyota Material Handling Europe is responsible for the organization's GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.

It is SGS' responsibility to express an independent GHG verification opinion on the emissions as provided in the Toyota Material Handling Europe GHG Statement for the period April/1/2024 to March/31/2025

SGS conducted a third party verification following the requirements of ISO 14064-3: 2019 of the provided CO₂ equivalent report during the period August to November 2025.

The assessment included desk reviews and interviews. The verification was based on the verification scope, objectives and criteria as agreed between Toyota Material Handling Europe and SGS on May/6/2025

Level of Assurance

The level of assurance agreed is a limited level of assurance.

Materiality

The materiality required of the verification was considered by SGS to be 10% based on the needs of the intended user of the GHG report.

Scope

Toyota Material Handling Europe has commissioned an independent verification by SGS of reported CO₂ equivalent emissions arising from their activities. The objective of the verification assessment is to establish conformance with applicable verification criteria within the scope of the verification, to enable submission of verified emissions data for the CDP. Data and information supporting the CO₂ equivalent statement were historical or modelled in nature and proven by evidence.

This engagement covers verification of emissions from anthropogenic sources of greenhouse gases included within the organization's boundary.

- The organizational boundary was established following the operational control approach and it includes Dealers over which they have operational control.
- Title or description of activities: Manufacturing, warehousing and office facilities, logistics and financial services.

- Location/boundary of the activities: Europe
- Physical infrastructure, activities, technologies and processes of the organization and offices.
- GHG sources, sinks and/or reservoirs included:
 Scope 1 – stationary combustion, mobile combustion,
 Scope 2 – purchased electricity.
 Outside of Scopes
- Types of GHGs included: CO₂, N₂O, CH₄, HFCs,
- Directed actions: none.
- GHG information for the following period was verified April/1/2024 to March/31/2025
- Intended user of the verification statement: Internal stakeholders.

Objective

The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the CO₂ equivalent emissions are as declared by the organization’s CO₂ equivalent statement
- That the data reported are accurate, complete, consistent, transparent and free of material error or omission.

Materiality

The materiality required of the verification was considered by SGS to be below 10%, based on the needs of the intended user of the GHG Statement

Conclusion

• The GHG information for the period April/1/2024 to March/31/2025 disclosing market-based emissions of 30,252 metric tonnes of CO₂ equivalent are verified by SGS to a limited level of assurance, consistent with the agreed verification scope, objectives and criteria. Scope 2 emissions below were calculated using the market and location based methods.

Scope	Verified Emissions (tCO ₂ e)
Scope 1	29,163
Scope 2 (Location-Based)	7,007
Scope 2 (Market-Based)	1,089
Out of Scope	4,693

SGS’ approach is risk-based, drawing on an understanding of the risks associated with modeling GHG emission information and the controls in place to mitigate these risks. Our examination included assessment, on a sample basis, of evidence relevant to the voluntary reporting of emission information.

SGS concludes with limited assurance that there is no evidence to suggest that the reported CO₂ equivalent statement is not materially correct and is not a fair representation of GHG information based on the calculation methodologies utilized.

We planned and performed our work to obtain the information, explanations and evidence that we considered necessary to provide limited level of assurance that the CO₂ equivalent emissions are fairly stated.

This statement shall be interpreted with the CO₂ equivalent statement of Toyota Material Handling Europe as a whole.

Note: This Statement is issued, on behalf of Client, by SGS United Kingdom Ltd, Rossmore Business Park, Inward Way, Ellesmere Port, Cheshire, CH65 3EN ("SGS") under its General Conditions for GHG Validation and Verification Services. The findings recorded hereon are based upon an audit performed by SGS. A full copy of this statement and the supporting GHG Assertion may be consulted via Toyota Material Handling Europe. This Statement does not relieve Client from compliance with any bylaws, federal, national or regional acts and regulations or with any guidelines issued pursuant to such regulations. Stipulations to the contrary are not binding on SGS and SGS shall have no responsibility vis-à-vis parties other than its Client.
